1. The following is an examiner's statement of reasons for allowance:

Claims 1-13 are allowed over prior art of record because the cited references either alone or combined do not disclose the claimed invention:

"An automobile system and an alarm system for an automobile, comprising: a power door; an alarm module including a logic circuit; a user interface for user input instruction opening or closing the power door;

wherein, when the alarm system module is in the armed state, the alarm system module is configured to generate a synthetic vehicle speed value that is greater than a threshold value, and wherein the power door is configured to automatically open in response to the user power door open instruction only when the synthetic vehicle speed value is below the threshold value; or

wherein the logic circuit is configured so that, when the alarm system module is in the disarmed state based on the state selection instruction received from the user, the synthetic vehicle speed value is approximately equal to the actual vehicle speed value, and when the alarm system module is in the armed state based on the state selection instruction received from the user, the synthetic vehicle speed value is made greater than a threshold value."
